

The logo for Stellar Aluminium Systems is centered within a white circle with a gold border. The word "stellar" is written in a bold, dark blue, lowercase sans-serif font. To the right of "stellar" is a small, stylized blue star icon with a trademark symbol (TM). Below "stellar" is the text "ALUMINIUM SYSTEMS" in a smaller, dark blue, uppercase sans-serif font. A horizontal gold line extends from the left edge of the white circle across the page.

Creating a
colourful **outlook**

The power of **colour, harnessed**

The power of colour is inescapable.

Colour can make a huge difference to the overall success of a glazing project, and in architectural terms, it can be a fundamental part of the whole.

It heals, energises and empowers. At Stellar, we've made it possible for you to harness this power with window and door palettes that bring you joy, calm, motivation – whatever you want for your home.

Colour and light. **Together as one.**

Your personality on the outside and our tech on the inside creates windows and doors that shine bright.

Stellar window and door feature our innovative and unique reverse butt joint. This exclusive design removes the need for ugly frame connections, creating sleek and uncluttered lines that perfectly define views in the colours you choose.

Available in double or triple glazed, this revolutionary system combines with frames that are 30% slimmer than our competitors', allowing more natural light into your home. Stellar's aluminium sections are finished with a tough polyester powder coat, which has been certified to the Qualicoat specification, which surpasses European requirements. This makes the range highly resistant to corrosion. Also the special marine-grade finish is ideal for more challenging environments.

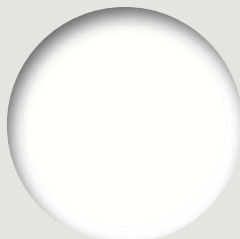

With **more than 150 different colours** from the full RAL powder coat range to choose from, rest assured that whatever your requirements, there will be a shade and finish to suit your project.

Stellar also offers the option of choosing a different colour inside and out, so it means that creating your own unique look is easier than ever.

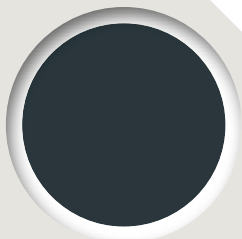

You can finish your windows and doors in any RAL colour, or choose from a range of classic and on-trend stocked colours, selected to enhance all types of building materials.

Colour without **compromise**

Loved by architects and designers, Stellar combines strength and clean lines for spaces that flow.

It's time to think bigger. The strength of Stellar aluminium frames allows you to replace walls with full expanses of insulated glass. Windows and doors are no longer purely functional, they're an interior design opportunity.

Why is the Qualicoat Standard important?

A Qualicoat certified powder coating exceeds both the current British specification and European Norm 12206-1:2004, meaning your frames are finished to the highest spec. The Qualicoat approval process also ensures consistency - delivering efficiencies and reducing the need for reworking..

Complete the look

Our minimalist design connects inside and out for maximum impact, creating living spaces that are truly transformed. And our range of colours allow you 'complete the look', finishing off your dream home with stylish windows and doors that ensure you never have to compromise.
